                                                                                                                                                                                                                                                                                                                                                                                                        Submitted (OCT-1995) to the EMBL/GenBank/DDBJ databases.
-- FUNCTION: E7 protein has both transforming and trans-activating activaties.
-- SIMILARITY: Belongs to the papillomaviruses E7 protein family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Human papillomavirus tyn
